

CAMWorks Virtual Machine Features	Bundles		
Functionality	STANDARD	PRO	PREMIUM
Direct Eureka Translator	X	X	X
APT-CL Simulation	X	X	X
True G-Code Simulation		X	X
Full 3D machine simulation	X	X	X
Starts from within CAMWorks	X	X	X
Material removal simulation	X	X	X
Automatic collision detection	X	X	X
Out of limits verification	X	X	X
Virtual Jog of the machine axes	X	X	X
Simulation of multi spindle machines	X	X	X
Simulation of synchronized and multi-channel systems	X	X	X
Precise time computation		X	X
Program editing capabilities		X*	X
Comparison of cut to design model		X	X
Ability to measure the cut model		X	X
Controller status view			X
Verification of probing routines			X
Arc-fitting and line-fitting functionalities			X
Toolpath optimization			X
Integrated machine assembling module			X
Stand Alone Operation with External File Open			X

* The ability to edit is available, but the edits cannot be saved on the Pro version
